## **DETAILED ACTION**

## Lack of Unity Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to a compound.

Group II, claim(s) 14-16, drawn to a method of making a compound.

Group III, claim(s) 17-20 and 30-31, drawn to a device.

Group IV, claim(s) 21-24, drawn to a method of making a device.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a *special technical relationship* among those inventions involving one or more of the same corresponding technical features which define a contribution over the prior art. See 37 CFR 1.475. The special technical feature of the present invention, a conjugated poly(1,4-arylene vinylene) compound comprising an arylene unit having adjacent substituents, does not define a contribution over the prior art, as is revealed by Friend et al (US 5,247190) on col. 4, lines 5-67 and

Application/Control Number: 09/529,873

Art Unit: 1774

col. 5, lines 1-41. Consequently, a lack of unity of invention exists. See 37 CFR 1.475 and MPEP 1850.

2. This application of Group I contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows: a conjugated poly(1,4-arylene vinylene) compound comprising an arylene unit having adjacent substituents, wherein the substitutes are selected from:

- (i) R-, RO-, RS-, and RR'N-
- (ii) a group in which the adjacent substituents together form a cyclic group.

In addition, applicants is also required to identify an ultimate species of the elected species, which will be used as a starting point for search and examination purposes. An ultimate species is a species with all the elements in the formula identified. For example, species (II) is an ultimate species for substitutes group (ii) listed above.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Application/Control Number: 09/529,873

Art Unit: 1774

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: claim 1.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each species for the substitutes listed above represents one special technical feature, therefore, they do not share the same special technical feature. Lack of unity exists.

3. A telephone call was made to Mr. Lawrence Oliverio on 6/8/2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ling Xu whose telephone number is 703-305-0395. The examiner can normally be reached on 8:00 - 4:30 Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cynthia Kelly can be reached on 703-308-0449. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-5409 for regular communications and 703-305-3599 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
